## EDUCATION

**KERALA UNIVERSITY**
Bachelor of computer application
2022 - 2025

**KERALA STATES BOARD**
Higher secondary
2020 - 2022

## SKILLS

- Quick learner
- Team player
- Creative Copying
- All-rounder
- Communication

## EXPERTISE

- Python
- Web technology
- Front-end developing
- Frameworks
- Chat-GPT
- AI technologies

## ABOUT ME

Self motivated and passionate individual with a strong knowledge in programming and different programming languages with a short time experience in developing web applications, Android application, and softwares. An all-rounder who can do multitasking which is both front-end and back-end using the help of chat-GPT with a collaborative mindset, and a good communication.

## WORK EXPERIENCE

### INTERNSHIPS

**QSPIDERS - KOCHI (PURSUING)**

Python Full-Stack ——————————————— NOW-2025

Pursuing an internship at QSpiders kochin and learning the course python Full-Stack as the part of internship, done projects and testing independently using the knowledge gained from the internship period. Learned languages : Python, SQL, HTML, javascript, CSS, Django and React(pursuing).

**LOGICCRAFT - MANAPPURAM**

Applications Development ——————————————— Jan - Jun 2025

Done internship and different types of tasks under the supervision and support of LogicCraft for the development of the mobile application CaterCraft and also done tasks that helped develop logic and visualisation which led to the UI/UX designing of other web application and redesign of the mobile application individually.
Learned languages : Python, SQL, HTML, CSS, JavaScript, Django, Flutter, Dart, Restful API implementation basics.

### PROJECTS

Projects learning & explorer Website – LogicCraft

Developed a web application using the help of chat-GPT for the UI/UX designing in the trending glassy light shaded cards and background. Done the back-end in python using the django framework and learned the implementation of Rest API using chat-GPT.

Catering and Event Registration Application – CATERCRAFT

Lead to the development of the mobile application named CaterCraft which was developed using flutter and python, using the Restful as the API where the front end was redesigned individually using the help of chat-GPT.

Heart Disease Prediction System - CardioGuard

Developed the front-end part using the help of chat-GPT and other generative AI.

Online Sports Registration – SPORTELLETTE

Developed a web application using .net and c# as the back-end.
