ALAN ROY

QA Analyst / Software Tester & Product Associate

Cherthala, Alappuzha, Kerala - 688541 • +91 7511136171 • alanroyff101@gmail.com • linkedin.com/in/alnroy • github.com/alnroy

PROFESSIONAL SUMMARY

User-centric **QA Analyst / Software Tester & Product Associate** with 1+ year of production experience executing end-to-end **Manual Testing, Functional Testing, API Testing, and User Acceptance Testing (UAT)** for complex enterprise systems. Skilled in **Agile & Iterative SDLC** environments—collaborating directly with stakeholders and clients through rapid feedback loops to analyze requirements, identify edge-case defects, test UI/UX workflows, and ensure zero-defect product deliverables across institutional banking formats.

TECHNICAL SKILLS

Testing Types:	Manual Testing, Functional Testing, User Acceptance Testing (UAT), Regression Testing, Exploratory Testing, Smoke & Sanity Testing
SDLC & Methodologies:	Agile & Iterative Development, Sprint Feedback Loops, Client Requirement Analysis, Defect Lifecycle Management, Test Case Design
API & Inspection Tools:	Postman (API Testing, Status Code & Payload Validation), Chrome DevTools (Network Inspection, Console Logs, Application Storage)
Product & UX Analysis:	Edge-Case Identification, Form Field Validation, Business Rule Compliance, Cross-Browser & Mobile Viewport Testing
Technical Literacy:	Python, JavaScript, SQL Queries (Database Data Verification), HTML5, CSS3, REST APIs, JSON Payloads, WebSockets
Collaboration & Tools:	Git, GitHub, Direct Client Feedback Integration, Issue Root-Cause Diagnostics, AI-Augmented Workflow Execution

PROFESSIONAL EXPERIENCE

QA Analyst & Product Operations Associate — Vadrida Technologies — Dec 2025 – Present | Kochi, Kerala

- **Agile Client Iterations & UAT:** Managed end-to-end Agile iterative testing cycles—translating banking client feedback into immediate feature refinements, repeatedly testing prototypes with office verifiers until exact operational requirements were achieved.
- **Banking Compliance & Field Verification:** Executed comprehensive functional test cases across 15+ institutional banking report formats (SBI, South Indian Bank, Muthoot, Axis), validating 140+ dynamic calculation and property description fields per case.
- **Edge-Case Discovery & Bug Isolation:** Uncovered critical data-integrity defects—including diagnosing asynchronous client-server race conditions where auto-save prematurely wiped populated form fields—and verified robust guard solutions ensuring zero data loss.
- **Postman API & Real-Time Sync Testing:** Performed manual API testing with Postman across REST endpoints (status codes, JSON payload accuracy, session auth); validated real-time WebSocket sync and offline PWA workflows under network drops.
- **Statutory Building Rules & IoT Verification:** Verified automated mathematical calculation engines against statutory building rules (KPBR/KMBR compliance and setback analysis); tested hardware biometric device socket communication and punch logs during network outages.

KEY PROJECTS

KSR Bait & Tackle — Retail Operations & E-Commerce Platform [Live Site: ksrbaitandtackle.in] — Functional Testing, UAT, Postman API Testing, Responsive UI

- Conducted rigorous manual, functional, and regression testing on a live commercial e-commerce store and retail ERP system before public deployment.
- Validated core e-commerce user journeys: product catalog filtering, dynamic cart updates, out-of-stock validation, and checkout flows across mobile and desktop devices.
- Executed Postman API test runs validating RESTful endpoints: verified JWT token authentication, error responses for malformed data, and relational data integrity in PostgreSQL.

CurateDrop — Automated E-Commerce & Affiliate Store Engine — Product Flow Validation, Edge-Case Testing, Mobile UI Testing

- Tested automated URL scraping workflows against Amazon product pages, ensuring robust error handling for missing specifications, varied pricing formats, and image galleries.
- Validated dual-channel order workflows: verified correct affiliate tag persistence on external redirects and tested message payload accuracy on WhatsApp order dispatches.
- Designed and executed test scenarios for two-factor **Delivery OTP verification workflows** (timeouts, invalid attempt lockouts, order status transitions) and responsive store admin UI.

INTERNSHIPS & EDUCATION

Full Stack Python Intern — Logiccraft Technology

Collaborated on web application development; gained hands-on experience in software testing, MVC/MVT architectures, and API validation.

Full Stack Python Trainee — QSpiders Kochi

Rigorous training in software testing fundamentals, defect tracking, Python programming, and SQL database queries.

Bachelor of Computer Applications (BCA) — Graduated 2025

Naipunnya School of Management
University of Kerala
