EDUCATION

Bachelor of computer application KERALA UNIVERSITY

2022 – 2025

Higher Secondary KERALA STATES BOARD

2020 – 2022

Languages

- Python
- JavaScript (ES6+)
- SQL
- Dart
- HTML5
- CSS3

Frameworks & Libraries

- Django
- Django REST Framework (DRF)
- Flutter
- React.js
- Node.js
- Tailwind CSS

Custom DevOps & Tools

- Git/GitHub
- Cloudflare (Cloudflared CI/CD)
- Domain Management
- Linux/System Admin
- VBA/Excel Automation

AI & Engineering

- Prompt Engineering
- LLM Integration
- Cursor
- AI Agent Orchestration

Databases & Caching

- PostgreSQL
- MySQL
- SQLite
- Redis

ABOUT ME

Passionate and highly efficient Full-Stack Developer specializing in rapid application development utilizing advanced AI tools (Cursor, Claude, LLMs) to maximize velocity and delivery. Proven track record of building, deploying, and maintaining production-level business systems, ERPs, and automation pipelines. Adept at bridging the gap between complex system design, RESTful architectures, and modern UI/UX frameworks.

PROJECTS

E-Valuate (Bank Valuation Automation PWA) 🔗

Technologies: Python, Django, JS, Redis, PyHanko, PyMuPDF, SQLite (Migrating to PostgresQL)

- Developed a Progressive Web App designed for banking property valuation that automates the workflow from initial site visits to final verified PDF report generation. Integrated secure digital signing mechanisms (PyHanko) and asynchronous background worker processing with Redis.

Convertto (OCR & Multi-Language Translation Platform) 🔗

Technologies: JavaScript, Python, Google Cloud Vision API (OCR)

- Built a custom text editing and optical character recognition (OCR) platform optimizing transcription workflows for data entry personnel. Programmed custom logic to translate and convert text among Malayalam, English, and Manglish layout structures.

CaterCraft (BCA Capstone Project) 🔗

Technologies: Flutter, Python, Django, REST API

- Designed a cross-platform mobile application and web portal for catering event coordination and business marketing. Created multi-tenant architecture allowing separate vendors to manage distinct product catalogs and incoming consumer checkouts.

Experience

Vadrida (OPC) Pvt Limited

Full-Stack Developer & IT Lead

12/2025 – Present | Kundanoor, Maradu, Ernakulam

- Architected and developed enterprise-level business systems and ERP automations, handling everything from database migrations to frontend delivery.
- Implemented automated PDF report generation and cryptographic digital signing pipelines using Python libraries (PyHanko, PyMuPDF).
- Designed and managed continuous integration and deployment (CI/CD) pipelines utilizing GitHub and Cloudflare Tunnel (cloudflared) to maintain zero-downtime Progressive Web Apps (PWAs).
- Configured and managed company infrastructure, including domain management, server hosting, and network solutions.

Freelance

Full-Stack Developer

06/2025 – 12/2025 | Remote

- Built tailored digital products and automated data tools for local business clients using React, Django, and Flutter.
- Developed scalable database schemas and integrated asynchronous task processing using Redis to optimize application performance.

QSPIDERS

Python Full-Stack Developer Intern

06/2025 – 09/2025 | Palarivattom, Kochi

- Completed intensive hands-on training in full-stack Python development, focusing on React.js frontends and Django backends.

LOGICCRAFT

Application Development Intern

01/2025 – 06/2025 | Cherthala, Kerala (Online)

- Assisted in developing web and mobile applications using Python, Django, and Flutter. Built and tested RESTful APIs using Django REST Framework (DRF) to ensure seamless mobile-to-web data exchange.
